REQUIRED TEXT:

Shen, Pellow & Ashby (September 2018). Environmental Injustice Behind Bars: Toxic Imprisonment in America. University of California, Santa Barbara: Global Environmental Justice Project. This report is available for download and on Canvas.

All additional course readings will be provided on Canvas, and many are freely downloadable from the UF Libraries or Google Scholar

COURSE DESCRIPTION: Using various theoretical and methodological approaches from the emerging field of conservation or “green” criminology, this course examines issues at the intersection of environmental change and environmental justice. With case studies ranging from gentrification in Florida, to electronic waste trafficking in Southeast Asia, and the relationship between fisheries collapse and slave labor in West Africa; the course builds awareness of the inequities of harm caused by the degradation of environmental resources and conditions.

Course Objectives:

By the end of the semester, students will be able to:

- Describe the four pillars of the Critical Environmental Justice framework
- Develop an understanding of the contemporary context and diversity of EJ issues from a local to a global perspective
- Be familiar with various causal theories associated with Environmental Justice (EJ) scholarship (e.g., environmental racism, world systems theory, intersectionality, settler colonialism) as they relate to a variety of contemporary EJ contexts

In-Class Recording: Students are allowed to record video or audio of class lectures. However, the purposes for which these recordings may be used are strictly controlled. The only allowable purposes are (1) for personal educational use, (2) in connection with a complaint to the university, or (3) as evidence in, or in preparation for, a criminal or civil proceeding. All other purposes are prohibited. Specifically, students may not publish recorded lectures without the written consent of the instructor.

A “class lecture” is an educational presentation intended to inform or teach enrolled students about a particular subject, including any instructor-led discussions that form part of the presentation, and delivered by any instructor hired or appointed by the University, or by a guest instructor, as part of a University of Florida course. A class lecture does not include lab sessions, student presentations, clinical presentations such as patient history, academic exercises involving solely student participation, assessments (quizzes, tests, exams), field trips, private conversations between students in the class or between a student and the faculty or lecturer during a class session.

Publication without permission of the instructor is prohibited. To “publish” means to share, transmit, circulate, distribute, or provide access to a recording, regardless of format or medium, to another person (or persons), including but not limited to another student within the same class section. Additionally, a recording, or transcript of a recording, is considered published if it is posted on or uploaded to, in whole or in part, any media platform, including but not limited to social media, book, magazine, newspaper, leaflet, or third party note/tutoring services. A student who publishes a recording without written consent may be subject to a civil cause of action instituted by a person injured by the publication and/or discipline under UF Regulation 4.040 Student Policy on Course Syllabi 3 UF, Academic Affairs, July 28th, 2021 Honor Code and Student Conduct Code

Accommodations: Students with disabilities requesting accommodations should first register with the Disability Resource Center (352-392-8565, www.dso.ufl.edu/drc/) by providing appropriate documentation. Once registered, students will receive an accommodation letter, which must be presented to the instructor when requesting accommodation. **Students with disabilities should follow this procedure *as early as possible* in the semester.**

Course Evaluations: Students are expected to provide feedback on the quality of instruction in this course by completing online evaluations at <https://evaluations.ufl.edu>. Evaluations are typically open during the last two or three weeks of the semester, but students will be given specific times when they are open. Summary results of these assessments are available to students at <https://evaluations.ufl.edu/results/>

Ground Rules and Classroom Norms:

Please be aware that the content of this course may be upsetting at times as we will be discussing crimes, incarceration, victimization, environmental toxins, harms, damage, and injustices and other topics that may be sensitive and generate strong emotions. Please be cognizant that some of your peers (or instructors) may have been involved or have close ties with people affected by environmental (in)justice issues. We all have different experiences based on race, ethnicity, nationality, gender, sexuality, abilities, socio-economic status, etc. Please be respectful of others' lived experiences, do not shame or make others feel embarrassed of their views or experiences. Acknowledge differences of opinions in a professional and respectful manner. Additionally, many of the topics in this course are contested and opinions and debates may illicit strong emotions. I expect all

students to approach this class in a professional manner and engage in mindful and civil discussion with peers. Personal attacks, intimidations, threats or aggression will not be tolerated.

I would like to set **Ground Rules** to help us navigate sensitive or difficult topics during discussions (source: <https://crlt.umich.edu/publinks/generalguidelines>)

- Listen respectfully, without interrupting.
- Listen actively and with an ear to understanding others' views.
- Criticize ideas, not individuals.
- Commit to learning, not debating. Comment in order to share information, not to persuade.
- Avoid blame, speculation, and inflammatory language.
- Avoid assumptions about any member of the class or generalizations about social groups. Do not ask individuals to speak for their (perceived) social group.

Further Guidance on Behavior During Class

- **Be an active participant.** Class participation is defined as the quality of your class involvement and attendance. This does not mean you must verbally participate but does require you to pay attention, and remain engaged through active listening and critical thinking during class time. If you choose to share your ideas (verbally or online) please use the ground rules established above.
- **Take responsibility for your education.** Attendance is crucial to your success in this class and readings should be completed prior to coming to class. ***You will not GET or BE GIVEN a grade in this class, you will EARN your grade (see work expectations, make-up policy, and grading below).*** Making yourself familiar with the syllabus, routinely checking Canvas, and seeking clarification when needed through in-class discussions, emails, or office hours are just some of the best practices. If you miss a deadline without a valid excuse, accept the consequences. If you miss a class, you are responsible for getting the notes from another student.
- **Refrain from disruptive or rude behaviors,** which includes arriving late, leaving early, sleeping, receiving or making calls, having side conversations, or making comments under your breath. You are adults and I expect you to use electronic equipment, such as laptops, smartphones, and tablets, in a manner that enhances your engagement in class rather than detracts from it, which requires you to practice self-restraint to avoid distractions. Texting, surfing the web, or watching web-based content unrelated to the class on mobile devices is distracting to you and others, is unprofessional, and demonstrates a lack of self-discipline. If you engage in disrespectful, disruptive or rude behaviors in the classroom, I may ask you to leave. Please be considerate.

Work Expectations, Class Attendance, And Make-Up Policy: This is a 3-credit hour class. For every credit hour spent in class per week, you will spend approximately 2-3 hours on outside work, which can result in a moderate to heavy workload of about 6-9 hours of outside work per week. Keep up with the readings and assignments or you will get behind.

- You will not be allowed to turn in late work or make-up exams without a valid university-acceptable excused absence. Consistent with UF policy, students who miss an exam due to a documented family or medical emergency, and who *discuss this problem with me in advance of the scheduled exam date*, will have an opportunity to complete a make-up exam, which may be given during the designated final exam period.
- Participation in official university activities which conflict with class meeting time and other reasons that may be determined appropriate by the university/instructor may also be permitted provided you **inform me of this conflict in advance**. Student athletes or those engaged in official university activities should provide me with the relevant documentation and schedule as soon as possible.
- If you miss an assignment because of a documented, excusable reason, you may be allowed to make up the work, or an alternate assignment may be given to you. Documentation must be provided within one week of the missed assignment and you will have one week to complete the make-up assignment. However, you will be responsible to meet all other assignment due dates as presented in the syllabus, while you complete excused assignments. Refer to the University of Florida grading policy on excused absences to define an excusable reason for missing class: <https://catalog.ufl.edu/ugrad/current/regulations/info/exams.aspx>

Academic Integrity & Dishonesty, Submitting Work, And Email: This course will include in-class assignments, discussions, and guest lectures, which means it is imperative that you attend regularly. The course instructor reserves the right to conduct pop-quizzes related to reading or reflection activities for points at other unspecified times.

- **Academic dishonesty is not tolerated at UF and the consequences for dishonesty are taken seriously and may have a range of outcomes.** UF holds its students to the highest standards, and we encourage students to read the UF Student Honor Code and Student Conduct Code (Regulation 4.040), so they are aware of our standards. Any violation of the Student Honor Code will result in a referral to the Student Conduct and Conflict Resolution and may result in academic sanctions. The two greatest threats to the academic integrity of the University of Florida are cheating and plagiarism. If you cheat you will receive an F and may face further disciplinary action. (<http://www.dso.ufl.edu/sccr/process/student-conduct-honor-code/>)
- **Canvas will be used throughout this course to post announcements, assignments, notes, readings, and grades.** I use Modules grouped by week and topic to organize supplementary readings, videos, and assignments. Grades will not be given out in an email or over the phone. Please check Canvas regularly for new items or adjustments to the syllabus.
- **Only .doc, .docx, and .pdf files are the only submission type that will be accepted within the Canvas portal.** I cannot download or view any other file format. If you send it with any other file extension and miss the deadline, it will be considered late. Incompletes for this course will only be given in dire circumstances and is at the sole discretion of the instructor. (<http://www.registrar.ufl.edu/grades/gradepolicy.html>)

- **Please use the Canvas message system to communicate with me or my official UF email (jkahler@ufl.edu).** If you leave an important message and get no response, follow up to make sure it has been received. For confidentiality reasons, YOU MUST USE YOUR UF EMAIL. I am not to conduct class business through other email providers because of confidentiality regulations.

Points: I want you to do well in the class and provide you with ample opportunities to do so. There will be **no extra credit offered to any student for any reason.** When calculating grades I use standard rounding procedures to round up to the next percent (≥ 0.5 will be rounded to the next whole number) without exception.

A	= 93 - 100%
A -	= 90 - 92%
B+	= 89 - 87%
B	= 86 - 83%
B-	= 82 - 80%
C+	= 79 - 77%
C	= 76 - 73%
C -	= 72 - 70%
D +	= 69 - 67%
D	= 66- 63%
D -	= 62 - 60%
E	= 59 - 0%

Assignments and Point Allocation: The graduate section of this course is meant to enhance your research and push yourself to work on your proposal, review literature, write a grant, etc., depending on where you are in your research process. You must relate this back to Environmental Justice, however, as that is the topic of the course. You are expected to critically read all the assigned materials as outlined in the syllabus below. However, you will be expected to engage additional scholarly material at the intersection of environmental justice and your primary area or geography of interest and produce graduate level written and oral products.

Participation during in class activities, online discussions, reading quizzes ,ect ¹	75 points
Academic Book Review	75 points
Annotated bibliography	50 points
Final Paper/ Project	100 points
Prepare and facilitate one class lecture	100 points
TOTAL.....	400 points

¹ You will be expected to complete the same in-class activities, quizzes and other online discussion assignments as your undergraduate peers.

Information on current UF grading policies for assigning grade points:
<https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx>

Participation: Class participation is defined as the quality of your class involvement and attendance, which includes arriving or logging in on time, having your readings completed prior to class, and thoughtfully and respectfully presenting your ideas and opinions in class. This course will include small break out groups, discussion streams, and guest lectures, which means it is imperative that you attend regularly. The course instructor reserves the right to conduct pop-quizzes related to reading or reflection activities for points at other unspecified times. Point allocation for in-class assignments, online discussions, quizzes and other reflections will be provided when they are assigned and generally are worth between 5 and 10 points per activity. Calculating your participation grade will be based on your attendance to during in-class activities, reviewing online discussion posts, and quiz grades and assigned tasks. If you miss a class, you are responsible for getting the notes from another student. You will be expected to set a good example for your undergraduate peers in terms of participation. This does not mean you must speak everyday but you must remain engaged in the classroom and online.

Academic Book Review: You will work with me to find a suitable published book that is at the intersection of environmental change and justice and your primary research interest or geography. The book review should follow a scholarly format and we can discuss potential venues for you to publish your book review. Resources to help you write an academic book review are listed below. Your book review is due on **Monday, March 27th at 11:59 pm via email unless we discuss an alternative date.**

Zvargulis (San Jose State University Writing Center). How to Write an Academic Book Review:
<https://www.sjsu.edu/writingcenter/docs/handouts/Academic%20Book%20Reviews.V2.pdf>

Academic Book Reviews: <https://natureofwriting.com/courses/common-writing-assignments/lessons/academic-book-reviews/topic/academic-book-reviews/>

Annotated Bibliography: In order to complete your final paper you will need to identify at least 5 peer-reviewed academic papers relevant to your topic and the intersection with environmental justice. For this assignment I want you to create annotated bibliography of these five key papers. For information on what an annotated bibliography is and how to write one please visit: <https://natureofwriting.com/courses/common-writing-assignments/lessons/annotated-bibliography/> We can discuss this further.

Final Paper/ Product: You will be asked to complete an individual project paper relevant to ECEJ and your graduate research. This could be in the form of a literature review for a qualifying exam or proposal, a paper for a professional conference or journal, or even a grant application. There will be a deadline for a title and abstract, which can be a discussion between the two of us before the first exam (week 8), and the final will be due on the last

day of class, which is Wednesday April 26th. I expect a high quality piece and we will work together to make sure the topic is appropriate.

Prepare and Facilitate One Class: Lastly, you will be preparing and giving a guest lecture on an environmental change and justice topic of your choosing. This means working with me to pull together appropriate associated readings/ activities/ etc. and creating a lesson plan for your lecture or learning activity which you will give during one of our regular appointed time slots. Currently I have you scheduled to present during Week 14, so you will have ample time to discuss and prepare. This will give you valuable instructional experience.

Reading & Assignments: Below is the current reading assignments for the semester. All readings listed for a particular date should be read *BEFORE* class so that you can engage in more meaningful discussion of the content. The instructor reserves the right to adjust the schedule and readings based on the availability of guest lecturers, flow of the class or unanticipated student interest in topics or current events during the semester. All revisions of the syllabus and reading materials will be posted on Canvas and any changes will be posted at least a week in advance.
